Size range: Men's sizes: from S to XL (full indications on the Information Notice)

Technical File: **DC-9721**

Test report: **RCT n° 3736007.01/E**

Functions and performance levels:

The garment offers limited protection against mechanical risks arising from impact and abrasion in case of a fall while participating in motorcycling activities: CE-Certified incorporated impact protectors provide strengthened protection.
This PPE item has reached the following performance:

Class A (*) = light-duty protective garments: the third highest level of protection. EN 17092-4 garments are expected to have the least ergonomic and weight penalties. Protective function is linked to the correct fit of the garment – also the inner impact protectors must be kept in their place: this falls within the responsibility of the user.

(*) = The applied Technical Draft document currently provides different levels of protection for garments including protectors/shells: from class AAA (highest level of performance) to class AA (medium level) to class A (lower level); - class B for garments not including protectors / shells = just abrasion protection; - class C for Impact protector ensemble garments.

Marking:

printed on stitched labels and displaying the following information:

- **CE Marking;**
- Name/trademark and web contact of the Manufacturer;
- item designation;
- pictogram to indicate the intended use (motorcycling) + class of protection achieved + reference to the Technical Draft;
- pictogram instructing to read the User Manual;
- on extra labels: material composition and cleaning instructions;
- additional info: nr. of the Notified Body, "Made in...", warnings, internal codes.
