DIRT RACER COLLECTION OFFROAD 2020

AVIATOR 2.3 HELMET

True champions never rest, there is always a new finish line to cross, a new challenge to overcome and a new track to race. Aviator 2.3 AMS2 (Airoh Multiaction Safety System) is the new version of the Off Road helmets line, that introduces important technological innovations (patented by Airoh) and brings significant improvements to the riding experience as well as rider safety. The result of all Airoh Helmet's know-how is a unique model in the world that redefines the standards of comfort, breathability and protection.

The total safety of Carbon Kevlar, a material that reduces weight whilst maximizing protection, is paired with two systems patented by Airoh Helmet: A.E.F.R. for the quick removal of cheek pads and AMS2, the most advanced system ensuring protection against angular impacts. It makes its debut in the Airoh Helmet range with the Aviator 2.3 model.

Another important aspect of the 2.3 version consists of the magnetic fastening system for the liners, that ensures a perfect lock in position as well as an easy removal.

The new KTM Aviator 2.3 will stand out in every situation with a striking, unique graphic and color variation. The wide field of view, the ventilation system with front, top and rear vents, as well as a chin guard vent, complete the evolution of the new Aviator.

FRONT

BACK

FEATURES

BREATHABLE
REMOVABLE AND WASHABLE INNER LINING

HIGH VENTILATION
THROUGH FRONT AND TOP VENTS,
CHIN GUARD AND REAR VENTSS

TECHNICAL DETAILS

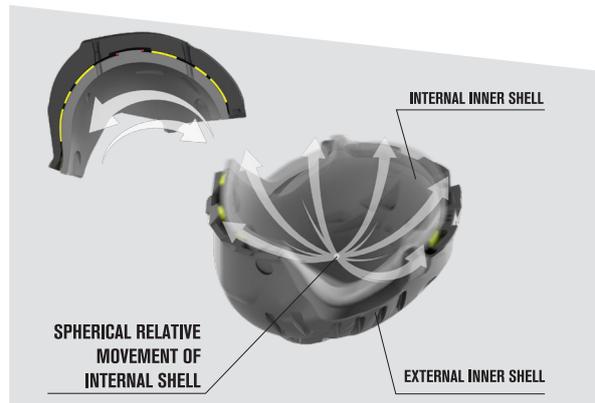

Material 100% Carbon Kevlar
Weight 1050g (+/-50g)
2 Shell Sizes 1: XS-M / 2: L-XL

INCLUDED ACCESSORIES

// GoPro kit // Extended peak
// Screw set // Upper vent cover

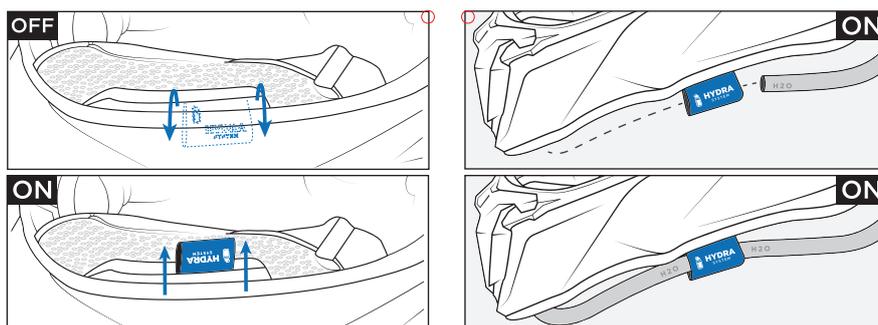

AMS² AIROH MULTIACTION SAFETY SYSTEM

PROTECTION AGAINST ANGULAR IMPACTS

HYDRA SYSTEM TAG

PERFECT INTEGRATION OF HYDRATION SYSTEM
